# SURVIVORS

**W**hen disaster strikes it comes like a thief in the night, stealing innocence and destroying lives. Large scale disasters can devastate entire nations and captivate the entire world.

When the stories of disasters enter our living rooms through the media, we are held spell bound, as if we have a common bond with the people being affected. The survivors of these world disasters are affected for the rest of their lives. What was it like going through a life and death experience? How has that experience changed their view of themselves and the direction of their lives?

Where are these people now, who for a brief moment, entered our lives as victims, heroes, and survivors? Their stories will encourage us and their spirit of survival will inspire us.

Each show will examine several world disasters through the eyes of those who survived. Dramatic re-enactments mixed with actual news footage will heighten the impact of their story.
